DESCRIPTION

2021 Maiora 30 Walk-Around

The new MAIORA 30 WALK-AROUND is designed, engineered, and built by the historical shipyard based in Viareggio, in close collaboration between the Centro Style Maiora and the design studio Quartostile in Turin. Awarded with the prestigious "Best Evolution" trophy and the World Yachts Trophies Awards in Cannes, this model rewarded the shipyard for being able to develop new models, while maintaining the distinctive stylistic lines that have become typical of all MAIORA motor yachts. This new model can be registered under 24 meters, whilst she has an overall length of 30.50 meters, and a beam of 7.50 meters, the largest in her category. The internal volumes and external areas are comparable to a Superyacht of 35 metres/115 feet. The huge interior volumes are framed by large windows that allow much more light in, as well as a complete and wide view of the outside, giving the interior more habitability and an even more spectacular appearance: a continuous environment with the outside - thanks to a generous height of 215 cm, typical of larger motor yachts. It is on the main deck that the large available spaces are most appreciated: the bright saloon offers both a relaxation area with large sofas with chaise longue and coffee table, and the dining area with a table where there are comfortable seats for up to 10 people. The goal with such layout is to obtain areas dedicated to the crew, without disturbing the presence of guests on board. The crew has access to the side entrance to the galley, which leads to the lower deck where there is a large dinette complete with seating, table, refrigerator, sink, TV and monitor for CCTV control and
